JIHAD AND TERRORISM

Misunderstanding Terrorism

Marc Sageman

Misunderstanding Terrorism provides a striking reassessment of the scope and nature of the global neo-jihadi threat to the West. The post-9/11 decade experienced the emergence of new forms of political violence and new terrorist actors. More recently, Marc Sageman's understanding of how and why people have adopted fundamentalist ideologies and terrorist methods has evolved. Author of the classic Understanding Terror Networks, Sageman has become only more critical of the U.S. government's approach to the problem. He argues that U.S. society has been transformed for the worse by an extreme overreaction to a limited threat—limited, he insists, despite spectacular recent incidents, which he takes fully into account.

Counter Jihad

America's Military Experience in Afghanistan, Iraq, and Syria

Brian Glyn Williams

Counter Jihad is a sweeping account of America's military campaigns in the Islamic world. Revising our understanding of what was once known as the War on Terror, it provides a retrospective on the extraordinary series of conflicts that saw the United States deploy more than two and a half million men and women to fight in Afghanistan, Iraq, and Syria. Brian Glyn Williams traces these unfolding wars from their origins in the Soviet invasion of Afghanistan through U.S. Central Command's ongoing campaign to "degrade and destroy" the hybrid terrorist group known as ISIS. Williams takes readers on a journey beginning with the 2001 U.S. overthrow of the Taliban, to the toppling of Saddam Hussein, to the unexpected emergence of the notorious ISIS "Caliphate" in the Iraqi lands that the United States once occupied.

Armies and Insurgencies in the Arab Spring

Edited by Holger Albrecht, Aurel Croissant, and Fred H. Lawson

Armies and Insurgencies in the Arab Spring explores the central problems surrounding the role of armed forces in the contemporary Arab world. How and why do military apparatuses actively intervene in politics? What explains the fact that in some countries, military officers and rank-and-file take steps to defend an incumbent, while in others they defect and refrain from suppressing popular protest? What are the institutional legacies of the military's engagement during, and in the immediate aftermath of, mass uprisings?

Crimes of Peace

Mediterranean Migrations at the World's Deadliest Border

Maurizio Albahari

In *Crimes of Peace*, Maurizio Albahari investigates why the Mediterranean Sea is the world's deadliest border, and what alternatives could improve this state of affairs. He also examines the dismal conditions of migrants in transit and the institutional framework in which they move or are physically confined. Drawing on his intimate knowledge of places, people, and European politics, Albahari supplements fieldwork in coastal southern Italy and neighboring Mediterranean locales with a meticulous documentary investigation, transforming abstract statistics into names and narratives that place the responsibility for the Mediterranean migration crisis in the very heart of liberal democracy. Global fault lines are scrutinized: between Europe, Africa, and the Middle East; military and humanitarian governance; detention and hospitality; transnational crime and statecraft; the universal law of the sea and the thresholds of a globalized yet parochial world. *Crimes of Peace* illuminates crucial questions of sovereignty and rights: for migrants trying to enter Europe along the Mediterranean shore, the answers are a matter of life or death.

Arab Fall**How the Muslim Brotherhood Won and Lost Egypt in 891 Days****Eric Trager**

How did Egypt's Muslim Brotherhood win power so quickly after the dramatic "Arab Spring" uprising that ended President Hosni Mubarak's thirty-year reign in February 2011? And why did the Brotherhood fall from power even more quickly, culminating with the popular "rebellion" and military coup that toppled Egypt's first elected president, Brotherhood leader Mohamed Morsi, in July 2013? In *Arab Fall*, Eric Trager examines the Brotherhood's decision making throughout this critical period, explaining its reasons for joining the 2011 uprising, running for a majority of the seats in the 2011-2012 parliamentary elections, and nominating a presidential candidate despite its initial promise not to do so. Based on extensive research in Egypt and interviews with dozens of Brotherhood leaders and cadres including Morsi, Trager argues that the very organizational characteristics that helped the Brotherhood win power also contributed to its rapid downfall.

China's relationship with the United States is vital to both countries and to the world. The relationship is based on both common and divergent interests in economics, military operations, and political goals and methods. China's international trading economy and ambition for a world-class navy require effective foreign diplomacy and participation in global affairs. This policy trifecta in large part defines China's posture to the world. Beijing is approximately halfway toward its mid-century goal of deploying a navy capable of defending China's perceived maritime interests. China's priorities follow President Xi Jinping's definition of national security as "comprehensive, encompassing politics, the military, the economy, technology, the environment and culture." What this means for future Chinese foreign policy choices, as naval modernization and energy security concerns enable different courses of action, Cole considers future Chinese foreign policy choices.

FOREIGN POLICY

Foreign Policy at the Periphery: The Shifting Margins of US International Relations since World War II **edited by Bevan Sewell and Maria Ryan**

Featuring original essays by leading scholars, *Foreign Policy at the Periphery* examines relationships among new nations and the United States from the end of the Second World War through the global war on terror. Rather than reassessing familiar flash-points of US foreign policy, the contributors explore neglected but significant developments such as the efforts of evangelical missionaries in the Congo, the 1958 stabilization agreement with Argentina, Henry Kissinger's policies toward Latin America during the 1970s, and the financing of terrorism in Libya via petrodollars. Blending new, internationalist approaches to diplomatic history with newly released archival materials, *Foreign Policy at the Periphery* brings together diverse strands of scholarship to address compelling issues in modern world history.

The Great War and American Foreign Policy, 1914-24 **Robert E. Hannigan**

In *The Great War and American Foreign Policy, 1914-1924*, Robert E. Hannigan challenges the conventional belief that the United States entered World War I only because its hand was forced, and he disputes the claim that Washington was subsequently driven by a desire to make the world "safe for democracy." Democratic President Woodrow Wilson's rhetoric emphasized peace, self-determination, and international cooperation. But his foreign policy, Hannigan claims, is better understood if analyzed against the backdrop of American policy—not only toward Europe, but also toward East Asia and the rest of the western hemisphere—as it had been developing since the turn of the twentieth century. On the broadest level, Wilson sought to shore up and stabilize an international order promoted and presided over by London since the early 1800s, this in the conviction that under such conditions the United States would inevitably ascend to a global position comparable to, if not eclipsing, that of Great Britain.

**American Power and Liberal Order :
A Conservative Internationalist Grand
Strategy**

Paul D. Miller

Miller blends academic rigor with his experiences as former Director for Afghanistan and Pakistan on the National Security Council to offer conservative internationalist prescriptions for US grand strategy. Dismissing claims of overextended US resources and perceived safety, Miller argues that nuclear autocracies, armed non-state actors, failed states, and the transnational jihadist movement still pose immense threats to American security and the in-

ternational system. His analysis offers policy options for balancing against the nuclear autocracies, championing liberalism to maintain the balance of power in its favor, targeting militant non-state actors, investing in governance in weak and failed states, and strengthening homeland security.

**The Other Air Force: U.S. Efforts to Reshape
Middle Eastern Media Since 9/11**

Matt Sienkiewicz

The Other Air Force gives readers a unique inside look at television and radio production in Afghanistan and the Palestinian territories, from the isolated villages of the Afghan Panjshir Valley to the congested streets of Ramallah. Communications scholar Matt Sienkiewicz explores how the U.S. takes a “soft-psy” approach to its media efforts combining “soft” methods of encouraging entertainment programming, such as adaptations of The Voice and The Apprentice with more militaristic “psy-ops” approaches to information control.

Crude Strategy

Rethinking the US Military Commitment to Defend Persian Gulf Oil

Charles L. Glaser and Rosemary A. Kelanic, Editors

Contributors delve into a range of vital economic and security issues: the economic costs of a petroleum supply disruption, whether or not an American withdrawal increases the chances of oil-related turmoil, the internal stability of Saudi Arabia, budgetary costs of the forward deployment of US forces, and the possibility of blunting the effects of disruptions with investment in alternative energy resources. The result is a series of bold arguments toward a much-needed revision of US policy toward the Persian Gulf during an era of profound change in oil markets and the balance of power in the Middle East

**Cassandra in Oz:
Counterinsurgency and Future War
Conrad C. Crane**

When Conrad Crane retired from active duty to become a research professor, he never expected to become a modern Cassandra, fated to tell truth to power without being heeded. After the world transformed on 9/11, he warned the Army that it was not prepared to execute stability operations, counterinsurgency, and the eventual reconstruction of Iraq. Crane's work attracted the attention of Generals David Petraeus and James Mattis, and he soon found himself in charge of a team tasked with creating the groundbreaking Field Manual 3-24/Marine Corps Warfighting Publication 3-33.5 Counterinsurgency, the very counterinsurgency doctrine he had pleaded for. A unique blend of traditional and modern theory, this manual would prove to be essential to the success of the Surge in Iraq that changed the course of the war.
